Read Me

1 Project Title

Laptop price prediction on the basis of different features.

2 Getting Started

A computer where anaconda (for python) has been installed is needed .Open the code with 'Spyder' and then give correct path for the .csv file. Import the library file in case the files are not imported already, then run the code.

3 Libraries and Packages to be installed

1. Numpy

2. Pandas

3. sklearn for regression and performance metrics

4 Python Version:

Python 3.6.3 or higher
